		Marina Kramskaya	2858
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).			
Status			
1)	Responsive to communication(s) filed on filing	of 07/01/2005.	
2a) <u></u> ☐	This action is FINAL . 2b)⊠ This	action is non-final.	
3)			
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.			
Disposition of Claims			
 4) ☐ Claim(s) 5-7 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) ☐ Claim(s) is/are allowed. 6) ☐ Claim(s) 5-7 is/are rejected. 7) ☐ Claim(s) is/are objected to. 8) ☐ Claim(s) are subject to restriction and/or election requirement. 			
Application Papers			
9) ☐ The specification is objected to by the Examiner. 10) ☑ The drawing(s) filed on <u>01 July 2005</u> is/are: a) ☑ accepted or b) ☐ objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.			
Priority under 35 U.S.C. § 119			
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 5-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Cramer et al., US 6,401,742.

As per Claim 5, Cramer discloses a conductive metallic (column 4, lines 60-62) soil penetrating electrode (combination of **31 & 33**) for use in making an electrical connection with the soil for the purpose of measuring soil electrical parameters (electrical potential: column 2, line 17), which has a long, small angle conical part (probe tip **31**) that permits totally intimate electrical contact with the soil as the electrode is driven in (into soil **52**, as in FIG. 6).

As per Claim 6, Cramer discloses a conductive metallic (column 4, lines 60-62) soil penetrating electrode (combination of 31 & 33) for use in making an electrical

in control Humber: Torocci, o

driven deeper than the length of said conical part.

Art Unit: 2858

connection with soil for the purpose of measuring soil electrical parameters (electrical potential: column 2, line 17), which has a long, small angle conical part (probe tip 31) that permits totally intimate electrical contact with the soil, and which has a shaft (34-35) that is undercut from the major diameter of the conical part forming a shoulder, said undercut preventing any additional electrode contact (i.e. 34 is insulated therefore

prevents electrode contact) area with the soil should the electrode be inadvertently

As per Claim 7, Cramer discloses a conductive metallic soil penetrating electrode as described in Claim 6, and further discloses a shaft (34) formed by an undercut section at the major diameter of the conical part, said undercut forming a shoulder that can be used as a gauge showing when the electrode has been driven to the correct depth in the soil (i.e. the electrode cannot be driven in part the cable 35; therefore the insulated portion 34 is a gauge for depth).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marina Kramskaya whose telephone number is (571)272-2146. The examiner can normally be reached on M-F 7:00-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz can be reached on (571)272-2180. The fax phone
